PROFESSIONAL SUMMARY

Salesforce Architect with 10+ years engineering scalable platform solutions across Sales Cloud, CPQ, Service, and Experience Cloud — with a background spanning end-user SaaS orgs and AppExchange ISV product development. Known for combining deep Salesforce expertise with modern AI tooling and development practices to accelerate delivery, reduce technical debt, and modernize quote-to-cash and revenue operations at scale.

SKILLS & EXPERTISE

Core Competencies: Salesforce Architecture • Enterprise Solution Design • System Integrations • API & Data Architecture • Quote-to-Cash / CPQ • Platform Automation • Agentforce & AI Automation • Sales Cloud • Service Cloud • Experience Cloud

Technologies & Platforms: Apex • LWC • Flow • Workato • MuleSoft • AWS • NetSuite • Java • Spring Boot • REST/SOAP APIs • MCP • CI/CD & DevOps • Salesforce DX • Claude • Codex • Cursor

Certifications: Salesforce Platform Developer I & II • Platform Administrator I • Javascript Developer I • Workato Automation Pro I, II & III

RECENT EXPERIENCE

Sr. Salesforce Architect - Reltio, an SAP company - (DEC 2021 - PRESENT)

- **Owned end-to-end Salesforce architecture** across Sales Cloud, CPQ, and revenue systems for a \$185M ARR SaaS org, streamlining quote-to-cash processes and accelerating deal velocity at scale.
- **Spearheaded a ground-up CPQ re-implementation** spanning pricing models, product configuration, and quote automation, eliminating legacy complexity and significantly reducing manual sales effort.
- **Engineered a usage entitlement framework** using QCP and CPQ data models with scheduled jobs to maintain accurate entitlement state and improve billing precision.
- **Architected Account-Based Marketing processes** within Salesforce supporting an ABM strategy recognized with Forrester and OpsStars awards.
- **Built a CPQ-driven churn forecasting solution** providing real-time visibility into at-risk accounts, directly informing retention strategy protecting millions in ARR.
- **Delivered real-time bidirectional data sync** between Salesforce and NetSuite, Jira, Slack, Xactly, and BambooHR, eliminating manual data handoffs and reducing reconciliation time by 80%.
- **Led a full platform automation overhaul**, migrating legacy Process Builder to Flow and Apex triggers, consolidating validation logic, and eliminating recurring production errors across the org.
- **Standardized engineering delivery and release governance** by implementing CI/CD pipelines, Bitbucket-based source control, and structured deployment processes across environments.
- **Developed end-to-end automation** between Salesforce sales workflows and backend provisioning systems, reducing onboarding latency and improving operational handoff reliability.

- **Established MCP server infrastructure and AI-driven workflow automation** to extend Agentforce capabilities across sales operations and product teams.

Sr. Software Engineer - Sparta Systems, a Honeywell company - (FEB 2019 - DEC 2021)

- **Built a high-volume record processing service** using Salesforce Bulk API and AWS (S3, SQS, DynamoDB) to enable reliable large-scale data migration from legacy document systems.
- **Reduced dependency on legacy file storage systems** by building a Box-to-AWS S3 migration service that modernized file storage architecture and improved long-term maintainability.
- **Delivered secure file access capabilities** by designing and implementing Spring-based REST APIs for retrieving and serving files stored in AWS S3.
- **Modernized core product UI** by migrating from Visualforce to Salesforce Lightning and LWC, aligning the application with the modern Salesforce platform architecture.
- **Owned CI/CD pipeline operations** using Jenkins, ensuring reliable build, test, and deployment workflows across Salesforce environments.
- **Increased developer productivity and release efficiency** by leading migration to Salesforce DX and adopting a source-driven development model.
- **Led remediation and performance optimization efforts** across Salesforce ISV applications, improving platform stability and reducing recurring production incidents.
- **Delivered 8 major and 6 maintenance releases** on schedule within a regulated life sciences environment, maintaining compliance standards and zero critical production defects.
- **Mentored junior developers and interns** on Salesforce development best practices, accelerating onboarding and raising overall team code quality.

Application Engineer III - iCIMS - (JUNE 2016 - FEB 2019)

- **Designed and implemented quote-to-cash integration** using MuleSoft, enabling consistent data flow between Salesforce, NetSuite, and external systems.
- **Improved implementation delivery efficiency and visibility** by designing and delivering a Salesforce-based project management solution for implementation teams, using Apex and LWC.
- **Architected customer feedback and enhancement intake capabilities** using Experience Cloud, improving visibility into product demand and feature prioritization.
- **Drove Salesforce platform modernization initiatives**, transitioning legacy architecture toward a scalable, modular design.
- **Improved lead ingestion-to-routing pipeline efficiency** by building a partner lead intake portal and Salesforce automation layer to process, route, and manage incoming lead data.
- **Designed and implemented enterprise data warehouse integration pipelines**, resolving data integrity issues and improving cross-platform reporting accuracy.

EARLY EXPERIENCE

Software Engineer - Limosys Software - (JAN 2015 - JUNE 2016)

Android Developer - Fingertip Technology - (AUG 2014 - DEC 2014)

EDUCATION

B.S. Computer Science – Thomas Edison State University
